Dear trade union friends,

On behalf of IF Metall and its 300 000 members in the Swedish industry I would like to convey our solidarity greetings to you and your members. It is with deep disgust we have learnt about the violent attacks on your organization last weekend.

This fascist attack against your national office and your trade union activities is an attack towards the right to organize in free and independent trade unions, but also against the democracy. An attack towards any trade union is an attack towards us all within the trade union movement.

The violent history of the fascist forces must always be remembered. We in the international labour movement must stand together and strongly condemn fascist's actions towards the democracy.

Mai più fascismi!

In Solidarity!

Marie Nilsson
President of IF Metall
